Manual de programador

Pingüino Mágico ha sido creado a partir de la base que Laravel ofrece.

CSS (app.css):

Para el diseño de la página, mi idea era ampliar y poner en práctica todo lo aprendido a lo largo del ciclo sobre CSS y ponerlo en práctica en vez de tirar de un diseño previamente diseñado, ayudándome de font-awesome para los iconos. Como es una base de datos para un juego de rol, quería que tuviese una estética de 'libro' sin renunciar al aspecto moderno, así que lo diseñé en tonos naranjas y marrones.

VISTAS (BLADES):

He hecho numerosos cambios a la plantilla original que genera el Laravel, para ajustarla mejor al diseño que tenía en mente así como traducir los elementos en inglés. Se han traducido TODOS los elementos de las vistas que venían por defecto en inglés en el Laravel. Como los cambios se extienden entre las 17 vistas del proyectos, por simplicidad adjunto el código de app.blade que aparece en la mayor parte de las vistas:

```html
